It was noted that the updates and revisions to the policy are required by law, so we can be in line with all general statues. The new policy took effect October 1<sup>st</sup>, 2025, so the recommendation is to approve the updates and revisions of the background check policy retro back to October 1<sup>st</sup>, 2025.

Project Lifesaver is based out of Virginia and located across the United States. Ms. Winstead then explained to the board the ins and outs of project lifesaver and how the program works. The cost analysis of the program would be \$6,000 for the basic cost with an annual fee of \$3,500 per year. Following discussion, it was suggested that the county manager gather more research and present it to the board during November's board meeting.

Javier Plummer, EMS Director presented to the board for approval information on donating an ambulance to Vance Granville Community College (VGCC). He stated that county staff would like to donate an ambulance that will no longer be in service when the arrival of a new ambulance transpires. We donated a van ambulance to VGCC back in February 2013; however, it is no longer operable and does not serve VGCC needs. The ambulance to be donated will serve the public safety department with their Emergency Vehicle Driver (EVD) course for their EMT students, that is taught as part of their curriculum. Due to changes over the years in ambulance size, the ambulance to be donated is the primary size of ambulances being utilized currently in industry. Vance County EMS has always supported VGCC with an ambulance to meet this need.

Following discussion, motion was made by Commissioner Thomas S. Hester, Jr., to allow County staff to move forward with the donation of ambulance #103 to VGCC to further educate their

students and potential perspective employees. This motion was seconded by Commissioner Charisse Fain and unanimously approved.

Randall Medlin, IT Director, came before the board requesting additional funds for four projects in the technology department. The four projects include the backup project, the VPN project, the remote support and PRA and the Sophos MDR. All four projects are in response to the cybersecurity incident we had back in the summer. The total request for funds would be \$74,163.76, which would equate to an annual increase on \$34,680.47 from what was originally budgeted.

Following discussion, motion was made by Commissioner Thomas S. Hester, Jr., to approve the request for funding as presented. This motion was seconded by Commissioner Leo Kelly, Jr. and unanimously approved.

Purpose: The Vance County Fire Department is requesting a budget amendment in the amount of \$190,000. Historically, the Fire Department has received funding consistent with the allocations made to the volunteer fire departments. However, that funding has traditionally been recorded as a revenue offset and not provided as an additional appropriation. This amendment establishes direct funding to the Fire Department to support its operational and capital needs. The \$190,000 will allow the department to:

- Cover regular capital expenses that are essential to maintaining readiness and reliability of services.
- Continue to support one-time equipment purchases, particularly for specialized rescue equipment that is vital for emergency response. This funding ensures that the Fire Department can maintain the same level of preparedness and capability that our citizens expect, while also providing flexibility to address evolving equipment and capital needs.

Purpose: Additional funding needed for the following IT projects.

Sophos MDR: Managed security project from to replace our previous security project. This is the software that protects our computers, laptops, and servers from malicious attacks. It is managed and monitored by a 24/7 Security Operations Center. We implemented this project directly following the DSS incident.

Backup Project: Replaces our current backup system with immutable cloud and local backups. This solution should be more resilient in case of another security event.

VPN Project: Replaces our previous insecure client VPN with a new system that meets or exceeds modern security requirements.

Remote Support and Privileged Remote Access: Replaces that aspect of our previous VPN that allowed third party vendors to access county systems they support with one that meets or exceeds modem security requirements. This also gives the IT department the remote support tools it needs to perform their duties more efficiently and securely.
